

RFP #15-004 – Conservationist Boat Engine and Generator

Questions and Answers

Revision 2

1. Do you want a heat exchange or a keel cooled engine?
 - a. Keel Cooled Engine

2. Can we provide an engine with a different RPM to meet the engine manufacturers rated HP and duty cycle and change the gear ration to maintain the desired output shaft speed?
 - a. As long as the horsepower is in between the (300-350) range and the RPM's are within a reasonable range of 1800 RPM's.

3. Do you require a power take off with an output shaft or a power take off with a hydraulic pump drive?
 - a. Hydraulic Pump Drive System
