Mississippi Coastal Cleanup Nets 2,218 Bags of Trash

More than **3,100** volunteers scoured Mississippi's beaches and waterways picking up marine debris at **77** designated cleanup sites during the 23rd annual Mississippi Coastal Cleanup, part of the International Coastal Cleanup—the world's largest volunteer effort to clean up the marine environment. During the 2011 Mississippi Coastal Cleanup, **3,102** volunteers picked up **2,218** bags of trash, including **55** bags of recyclables, along **202** miles of Coastal waterways in Hancock, Harrison and Jackson counties. The cleanup is organized by the Mississippi Department of Marine Resources and Mississippi Marine Debris Task Force. The Mississippi Coastal Cleanup returned to the beaches and barrier islands and again expanded its reach through its partnership with Mississippi Power's Renew Our Rivers program, cleaning four sites on the days leading up to the October 15 cleanup and one additional site on cleanup day.

All told, 3,102 volunteers collected 123,032 pounds of trash including 171 tires—that's 61.5 tons of marine debris. This included items too large to fit in trash bags such as household appliances and remnants of homes washed away during Katrina. More than 20 tons of debris was removed from the Ansley Preserve alone using heavy equipment as part of the Renew Our Rivers program. Other items found were: a channel marker, remnants of homes, jet ski, car bumper, propane tanks, more than one refrigerator, coffee maker, furniture, golf club, tractor tire, blow-up mattress, fire alarm, parking barricade, electrical wire, plastic window, baby carriage, wooden door, dead alligator gar, hypodermic needle, Bacardi sign, television child's car seat and 500 square feet of plastic sheeting was found on Sand Island. Also, volunteers collecting trash at four sites in Jackson County separated out and filled **55** bags with recyclable items.

During the International Coastal Cleanup, hundreds of thousands of people across the world spend three hours combing the beaches and waterways to pick up trash that pollutes our waters, harms marine life, hampers tourism and poses health risks to beach-goers. During last year's International Coastal Cleanup, more than 600,000 volunteers in 108 countries removed more than 8 million pounds of debris from the ocean, rivers, lakes and waterways.

"Our coastal waterways provide food for our families, recreation and livelihoods for many of us," said Lauren Thompson, state coordinator for the Mississippi Coastal Cleanup and public relations director for the Mississippi Department of Marine Resources. "It's the lifeblood on which our fisheries and marine wildlife depend. Our annual coastal cleanup is a reminder that, yes, we can make a difference in keeping our shorelines clean and litter-free: One cigarette butt at a time, one piece of fishing line at a time, one plastic bag at a time."

The mission of the International Coastal Cleanup is to remove debris from shorelines, bayous, bays, rivers, waterways and beaches; collect valuable information on the amount and types of debris collected; educate people on the issue of

marine debris; and use the data collected to effect positive change. Volunteers clean beaches and collect information on what they find, using the International Coastal Cleanup Data Card, so that sources of marine debris can be targeted for education or pollution prevention campaigns. State coordinators mail the data cards to the Ocean Conservancy in Washington, D.C. where the data is tabulated. Over the years, data from the cleanups have been used to enact local, state, national, and even international legislation and agreements.

After the Mississippi Coastal Cleanup, Bob Taylor, president of the Gulf Coast Restaurant Group (which includes Half Shell Oyster House, Bob's Burger Factory, Southern Flavor Catering & Events, High Cotton Grill and The Quarter), treated **550** volunteers to a free lunch of hotdogs, hamburgers, chips, fruit and cold drinks served by their staff from 11 a.m. to 1 p.m. at the Ken Combs Pier parking area at Courthouse Road and Hwy. 90 in Gulfport. Sysco, Gulf Coast Produce, Cabot Cheese and Coast Coca-Cola Bottling Co. also provided food and drink for the event.

In Hancock County, the Office of Congressman Steven Palazzo and the Bay St. Louis Rotary Club treated volunteers to hotdogs at a cookout held at the Depot in Bay St. Louis while BB's Snowballs provided snowballs. In Jackson County, 850 volunteers received a free barbecue lunch of pulled pork and beef brisket, chips and drinks at the Estuarine Education Center at Mississippi Gulf Coast Community College in Gautier courtesy of The Shed Barbeque & Blues Joint.

Volunteers who cleaned the beach and filled out data cards, documenting what litters our shores and waterways, also received a re-usable fold-up tote, compliments of Chevron Pascagoula Refinery.

"The turnout today and the support that the Mississippi Department of Marine Resources has received from the Mississippi Marine Debris Task Force and our more than 80 sponsors is a clear indicator that many Mississippians do care about our coastal environment," Thompson said. "They understand and see it as an extension of our own backyards that we can care for, maintain and protect not just today, but each and every day by choosing to dispose of our trash properly."
