MDMR contractors to conduct prescribed burn on Delisle Unit of the Wolf River Coastal Preserve

BILOXI, Miss. – Contractors working with the Mississippi Department of Marine Resources will conduct a prescribed burn on the Delisle Unit of the Wolf River Preserve on Friday, Sept. 13, 2019.

Depending on weather conditions, the burn will begin between 10 a.m. and noon and last up to six hours; however, some of the trees could smolder for much longer.

The burn will take place on a 58-acre section on the southern end of the unit adjacent to the marsh. This portion of the preserve will be closed to the public during the burn. MDMR officials are encouraging residents and the public to stay out of the area for at least a week because dead trees and debris may continue to smolder and give way after the burn is complete.

The prescribed fire will help remove heavy fuel loads from the ground, promote a healthy understory for wildlife habitat and function as a site prep aid for tree plantings and restoration efforts. The fire will also aid with the removal of invasive species, such as Chinese Tallow, as well as increase access to infested areas for additional treatment.
