11. Narrative Project Description:

Hurricanes and Tropical Storms have deposited sediment and debris in Seacliff Bayou over the past 10 years. on October 8, 2017 Hurricane Nate impacted the eastern coastal Mississippi and western coastal Alabama. The storm displaced large debris and sediment as it moved north from the Gulf of Mexico to the shores of Mississippi. This debris field not only decreased the depth of the channel, but more importantly accumulated tree limbs, stumps, and other rubbish, creating hazardous boating conditions. JCBOS is proposing to dredge approximately 38,960 cubic yards in response to impacts endured during Hurricane Nate and various Hurricanes and Tropical Storms for the past 10 years as well as annual sediment acculation.

12. Provide the names and addresses of the adjacent property owners. Also identify the property owners on the plan view of the drawing described in Attachment "A". (Attach additional sheets if necessary.)
