**About the Position**
This is scientific supervisory work with responsibility for providing coordination and supervision of a major marine resource programs within the Finfish Bureau of the Mississippi Department of Marine Resources to ensure that the Department fulfills its legislatively mandated mission. This position is multi-faceted and has local, state, regional, and national economic and environmental impact. The work involves formulating, initiating, directing, controlling, and implementing various fisheries programs through subordinate personnel and requires technical education and / or expertise. The job requires advance knowledge in data analysis, fisheries management and statistical software used for both. The incumbent recommends substantive program policy in accordance with state and federal regulations and decisions of the Department of Marine Resources and provides input into significant Department operations. Additional recommendations include knowledge of regional and federal management requirements and fishery dependent and independent projects undertaken by the agency. Coordination of the work with other offices, bureaus, and divisions within the Department and with other control authorities and special interest groups is required. Supervision may be exercised over subordinate technical staff, or the incumbent may functionally supervise major program initiatives. The work is subject to periodic review by the Finfish Bureau Director. This is a time limited position.

**What you'll need to be Successful**
Knowledge of fishery dependent and fishery independent projects undertaken by the bureau. A baseline understanding of common fishery management principles and quantitative fisheries methods is recommended. Good communication skills and effective supervision of staff and a variety of functions are essential to adequately perform in this position.

**Preferred Qualifications**
Requires a bachelor’s degree and a minimum of 4 years experience.
